### Technical guidelines - structure regulations (excerpt):

Hall walls, supporting pillars and supports of the roof construction as well as pipes and other parts of the building installation may not be loaded by the stand construction. Ceiling suspensions may only be provided by a contracting company taking into account the static specifications of the hall operator. This requires a written order with exact weight specifications and plans with the positions of the loads to be suspended. The contract is only concluded with an order confirmation from the contracting company [here: GREGER Eventservice Johannes Greger]. This order confirmation will only be issued by the contracting company if a structural analysis carried out by it on the basis of the data provided by the exhibitor shows that the desired suspensions are statically permissible and technically feasible. The building regulations of the City of Augsburg must be observed. The exhibitor shall be solely liable for this construction.

### The specified load capacities of the ceiling suspensions are maximum values for static load and must not be exceeded even for short periods for the superstructure.

This means in particular, if not explicitly ordered, that no chain hoists may be attached to the suspension points for assembly work (dynamic load!). Standard suspension points may only be installed from the ground using lifting platforms or material lifts (geniuses). Combined constructions (upright and suspended) are only possible in exceptional cases and after exact static testing, please submit the static calculations. If the suspension points are overloaded due to unauthorised use of chain hoists, unauthorised modification or improper use, the suspension points may no longer be used for safety reasons. The replacement of the suspension point material required as a result will be charged to the exhibitor at the new price plus working time and any inspection of the roof construction of the hall.

Height of suspension above the hall floor: \_\_\_\_\_

Weight of suspended construction (showing mounting height): \_\_\_\_\_

Total number of suspension points required: \_\_\_\_\_

**Plans must be enclosed!**

In addition, we refer you to the „Technical Guidelines / Construction Regulations“ in the Service Manual for Exhibitors. These are also part of the „Special and General Conditions of Participation“ of Messe Augsburg ASMV GmbH.

The order will be placed under acceptance of the Special Order Conditions printed overleaf!

**Continuation of the order of suspensions at GREGER Eventservice Johannes Greger:**

	<b>EUR / unit</b>	<b>Quantity</b>
<b>Ceiling suspensions (Halls 1, 2 and 5 max. height 9m; Hall 4 max. height 7m)</b>		
Suspension point 30kg (any position, NO chain hoists allowed!)	EUR 138,00	_____
Suspension point 80kg (any position, NO chain hoists allowed!)	EUR 199,00	_____
Suspension point 250kg for chain hoist (from Pre-Rigg or hall girder)	EUR 265,00	_____
<b>Ceiling suspensions (Halls 3 and 7 max. height 7m each)</b>		
Suspension point 30kg (any position, NO chain hoists allowed!)	EUR 124,20	_____
Suspension point 80kg (NO chain hoists allowed!)	EUR 179,10	_____
Only on request and after static calculation		
Suspension point 150kg for chain hoist	on request	
<b>Power cable from the main connection at the trade fair stand to the suspension point</b>		
Power supply 3kW	EUR 72,00	_____
Power supply 10kW	EUR 84,00	_____
<b>Chain hoists (only in halls 1, 2, 4 and 5 from girder or pre-rig, plus suspension point)</b>		
Manual chain hoist	EUR 145,00	_____
Electric chain hoist (incl. motor controller)	EUR 308,00	_____
<b>Traverses (prices per meter)</b>		
2-point traverse 30cm (aluminium lattice girder)	EUR 27,00	_____
3-point traverse 30cm x 30 cm	EUR 38,00	_____
4-point traverse 30cm x 30 cm or 40 cm x 40 cm	EUR 46,00	_____
Corners / Special parts	from EUR 65,00	

**Working platforms / assembly lifts (plus EUR 30.00 for delivery and collection per unit)**

Assembly (date / time): \_\_\_\_\_

Dismantling (date / time): \_\_\_\_\_

**Special Order Conditions for GREGER Eventservice Johannes Greger**

**CEILING SUSPENSION**

Steel rope 6mm, galvanized, wire rope holder (Reutlinger type 60) with ring nut. Transfer: Chain quick connector 10mm, for suspensions with dynamic load: min. 9mm steel cable or Steeflex Transfer: O-ring.

Suspensions without assembly of exhibitor's own material. The suspension point material is made available on a rental basis, missing material will be recalculated. Changes to the suspension point by the exhibitor are not permitted. Any resulting damage to the sling material due to improper operation will be charged at the new price of the material. In such a case, the material will be checked by a GREGER Eventservice expert and must be withdrawn from circulation. For safety reasons, the material may not be handed over.

**POWER SUPPLY**

Cable from booth/cabin perpendicular to hall ceiling and then to suspension point. The power requirement must be taken into account when ordering power.

**PRICES**

The stated rental prices are valid for the entire trade fair and include assembly under standard conditions. Additional costs and assembly of customer material will be charged at 45.00 € per hour plus necessary material, assembly lifts or lifting platforms and must be paid immediately.

All prices plus VAT at the statutory rate.

**SURCHARGES**

For orders received after the deadline or which are not complete (plans, all dimensions) 25%, from 14 days before the start of the trade fair and repeat orders during set-up 50%, on the last set-up day 100%!

**PAYMENT**

Payment in advance or on site during construction in cash or by credit card directly to GREGER Eventservice Johannes Greger.
