## Special ordering conditions Water and waste water connection

### 1. Scope of services

Messe Augsburg shall provide the water and sewage connections required by the exhibitor within the framework of the event in accordance with the exhibitor's order overleaf and shall supply the exhibitor with all of his water requirements. The current technical regulations as well as the generally accepted rules of technology form the basis. Supply lines, pipes, valves etc., will only be rented to the exhibitor for the purpose of making connections and remain the property of Messe Augsburg or Stadtwerke Augsburg. Messe Augsburg's obligation to deliver shall not apply as long as and to the extent that Stadtwerke Augsburg Wasser GmbH is released from its obligation to supply the exhibition site. The same shall apply if circumstances on the exhibition site (e.g. a burst pipe) result in an interruption of the water supply for which Messe Augsburg or Stadtwerke Augsburg are not responsible.

### 2. Obligations of the exhibitor

To order a water and sewage connection, use form 7 „Water and sewage connection“. The order and the stand installation sketch must be submitted to Messe Augsburg no later than the order deadline stated on the form. The exhibitor must specify the exact performance acceptance (connection devices); this will be checked by Messe Augsburg on an ongoing basis. A water consumption that exceeds the normal (e.g.: swimming pool, continuous operation of equipment, etc.) will be charged subsequently. For systems that are not supplied from the basic network due to their high connected load special connections are necessary. The exhibitor must ensure that the material used to make the connections is available again after the end of the event, complete and undamaged, for dismantling by Messe Augsburg or can be received by it.

### 3. Safety regulations

Connections from the existing ring line to the stand may only be made by Messe Augsburg. Systems and equipment must comply with the regulations of DIN 1988, DIN 2000 and be inspected by a specialist. Water hoses are not permitted during installation. All materials used must be legally approved for drinking water supply. must be permitted. Leaks must be reported immediately by the exhibitor to Messe Augsburg. The shut-off valve installed at each connection must be closed in the evening by the exhibitor on his own responsibility.

### 4. Costs/accounting

Normal water consumption is included in the connection price. Surcharges will apply for services which Messe Augsburg is not aware of 14 days before the start of the event or which cannot be prepared from this date due to incomplete or unusable order details. These are 25 % for services based on fixed prices and 50 % for directorial work. The date on which the order is received by Messe Augsburg is decisive for compliance with the deadline. If the stand installation is dismantled, the exhibitor will be invoiced for any missing parts at the replacement price. All prices do not include statutory VAT. All invoices are due for payment without deduction immediately upon receipt. Messe Augsburg shall be entitled to activate the water and/or compressed air supply only after payment of an advance payment covering the anticipated costs of the connection. Each invoice must be checked immediately. Complaints about the scope of the invoiced deliveries and services must be made immediately.

### 5. Liability

The liability of the parties as well as their vicarious agents for culpably caused damages is excluded, unless the damage was caused by intent or gross negligence; this does not apply to damages resulting from injury to life, body or health or the violation of essential contractual obligations, i.e. such obligations, the fulfillment of which makes the proper execution of the contract possible and on the observance of which the contractual partner may regularly rely (so-called cardinal obligations). In the event of a breach of material contractual obligations which are not based on intent or gross negligence, liability shall be limited to the damage which the liable party foresaw as a possible consequence of the breach of contract at the time of conclusion of the contract or which the liable party has suffered in consideration of the Circumstances she knew or should have known should have foreseen. The provisions of the Product Liability Act shall remain unaffected.

### 6. Connection separation

The unauthorised connection of cables and equipment to existing cables of another stand is not permitted and entitles Messe Augsburg to disconnect the connection immediately. The connection of unregistered equipment shall entitle the exhibitor to block the connection immediately in order to ensure an even supply to all exhibitors.

### 7. Exemption of Messe Augsburg from its obligation to service provision

In the event of an interruption or irregularity in the water supply, or a malfunction in the main network connection of the exhibition site, Messe Augsburg shall be released from its obligation to provide services. The same shall apply if circumstances on the exhibition site (e.g. a burst pipe) result in an interruption of the water supply for which Messe Augsburg or Stadtwerke Augsburg are not responsible.

### 8. Termination

The Exhibitor has the right and the obligation to also terminate the contract for the provision of water connections in the event of a cancellation of his participation in the event. However, the client shall bear the costs already incurred if he fails to comply with the contract.

Contractor has not notified us in writing at least 14 days prior to the start of the event.

9. Costs for the elimination of disturbances caused by the exhibitor or by caused by third parties commissioned by the exhibitor shall be borne by the exhibitor.

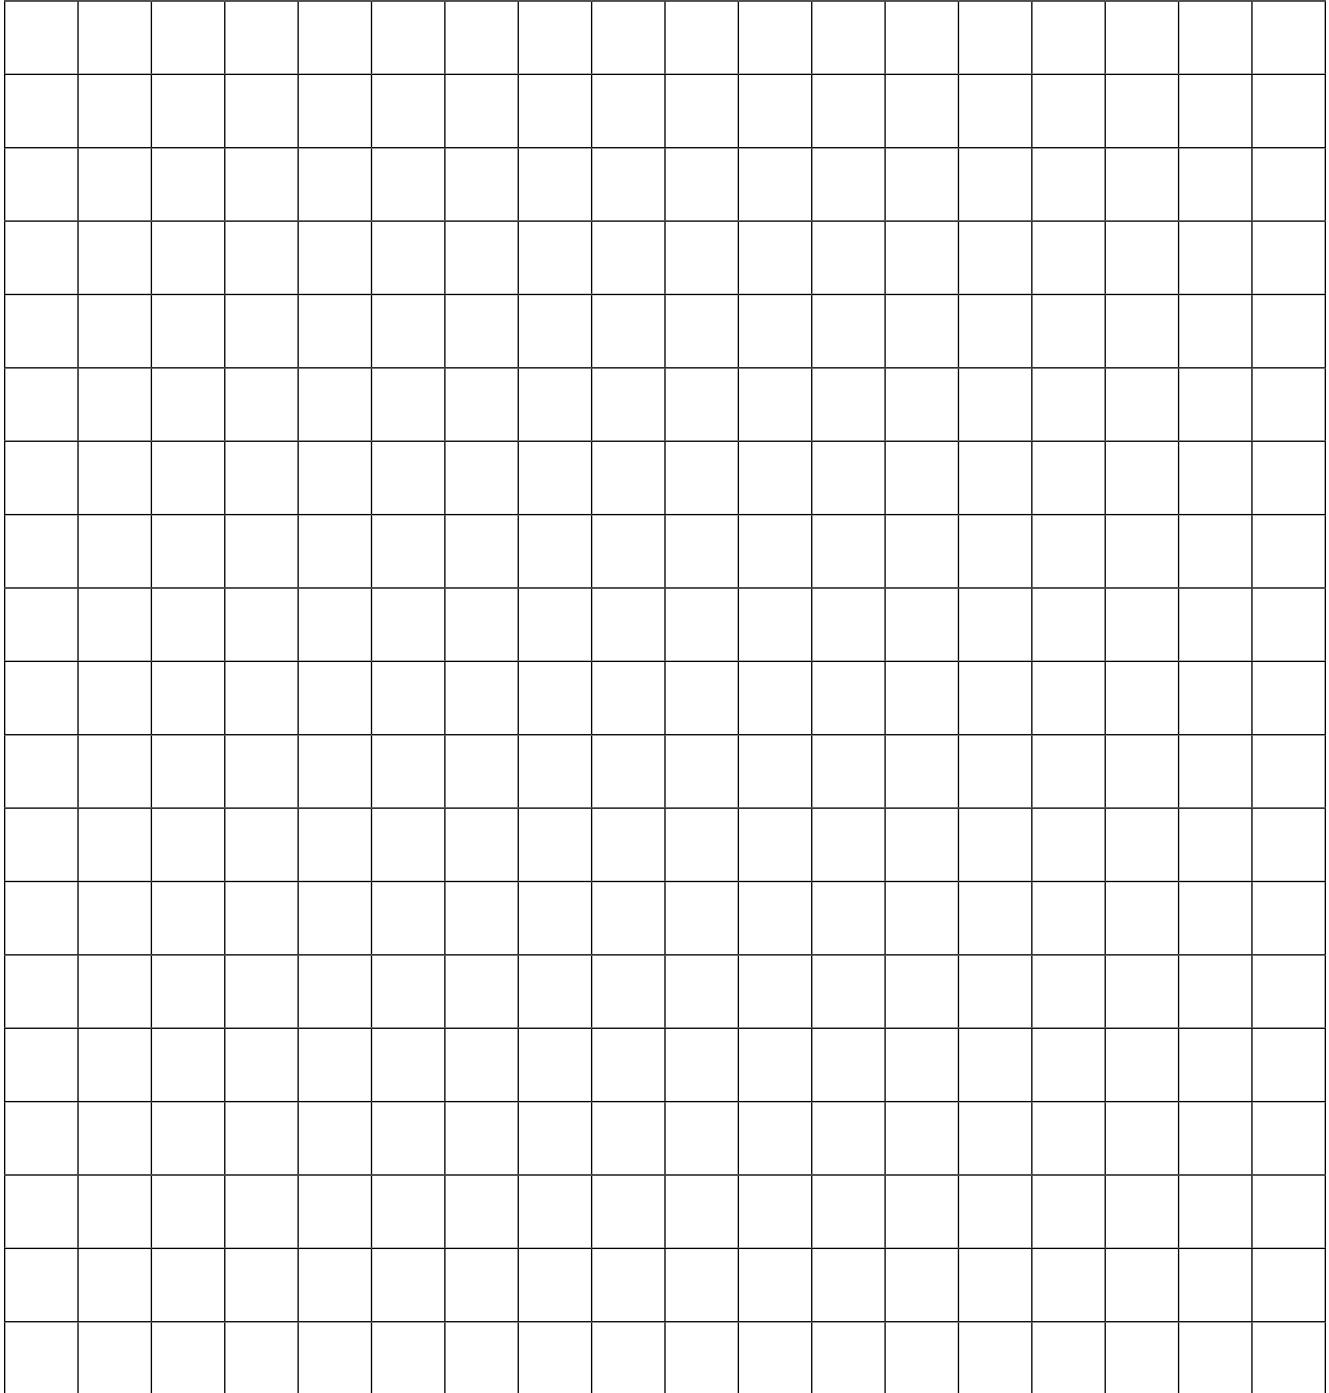

10. All regulations and conditions specified on this form take precedence over the General Conditions of Participation of Messe Augsburg ASMV GmbH and the Special Conditions of Participation of AUGSBOW 2021 with regard to the services ordered here.
